Living Walls

by degardo®

degardo®

We love gardens as much as we love good design.
We are Degardo®.

South of the « Wiehengebirge » mountains and west of the Weser river – that is where Degardo® is located. We have been producing high quality planters and fencing in this varied landscape for over a century. Our products fit perfectly into any environment, with their interplay of form and colour, inspired by the best architect in the world: nature.

We observe and analyse current trends, placing great value on selecting durable, resource-efficient materials. We also offer a comprehensive range of accessories.

Come and discover our design concepts – made in Germany!

Your Degardo® team

Living Walls by degardo®

One system - endless possibilities

Whether you are looking to improve the indoor climate or need a green privacy screen, with Living Walls from Degardo® you can be creative and at the same time build oases of well-being both indoors and outdoors.

Special features

Green exterior and interior

The intelligent, double-walled, pockets of the Living Walls offer stability for your plants and contain the possibility of an integrated water drain in each pocket. Watering can be done both manually or with a conventional watering system. The large volume of each double-walled pocket offers lots of space for growth, ensuring your plants can flourish.

By the way: Living Walls by Degardo® are produced climate-neutral in Germany, from recycled plastics.

Durable, sophisticated material

Quality for every occasion: as a climate-neutral company we use environmentally-friendly materials in production.

Purpose-made, reliable watering system

Our Living Walls are designed for easy integration of almost each conventional watering systems to make automatic watering simple.

Simple, handy drip tray

Special drip trays reliably catch excess water and are easy to empty.

Product overview

Natural design oases for every environment

Whether as a luxuriant herb garden on the balcony or for greening entire walls in house and garden, our modular planting system offers almost limitless design possibilities.

Delivered without plants

Indoor &
outdoor

Need inspiration?

Be a green trendsetter!

Whether in a private or public space, vertical greening is right on trend. There are many options for the modern art of planting. However a few basic rules need to be considered when choosing your plants. We have put together a few tips and tricks for you here. You will also find a selection of plants which are suitable for both indoor and outdoor planting. Get your gardening head on and let us inspire you!

The basics

When planning green walls there are a few ground rules which need to be considered for vertical planting. Before starting, it is essential to find out information about the need for light and shade, as well as the recommended water supply and the optimum condition of the plant's nutrient medium. We also advise taking note of the following:

Replanting is stressful for plants. You can expect that a small number of your plants will need 2-3 days to get used to the new conditions.

Choose regional plants for outdoor greening: local varieties are best suited to the prevailing climatic conditions and soils.

Remember that every plant will have different light requirements. Depending on the case, additional artificial light may be needed.

Is the indoor air too dry? Then ask your salesperson about plants which can help humidify the air in the room.

Plants that have a lot of flowers should be looked at critically. These plants are already well advanced in their growth cycle and need a lot of energy.

For smart spenders: small plants are cheaper. You can save money if you're prepared to be patient.

These plants love being indoors:

Whether trendy succulents or classic green lilies, you can use these plants for a variety of indoor applications.

Peperomia Caperata

Chlorophytum

Sucus

Callisia tute

Syngonium

Rhipsalis

These plants love being outdoors:

Resilient in all weathers, these plants are particularly suitable for outdoor use.

Sempervivum groen

Verbena

Buxus sempervivum

Euonymus fortunei

Ficus pumila

Lavandula
